

FARM PLANNING TOOL

GENERATE A REPORT FOR ANY FOREST OR FARM IN PUERTO RICO OR THE UNITED STATES VIRGIN ISLANDS

Access the tool at the: [Farm Planning Tool Website](#).

Get to know environmental characteristics of your land

- land cover
- soil types
- flooding risk
- elevation
- geology
- hydrography
- precipitation
- temperature

1

Access the [website](#). Write your land location in **Enter the address** box and click **Search**. You can write the barrio or the street. Use the mouse or the + and - signs to move through the map to find your land.

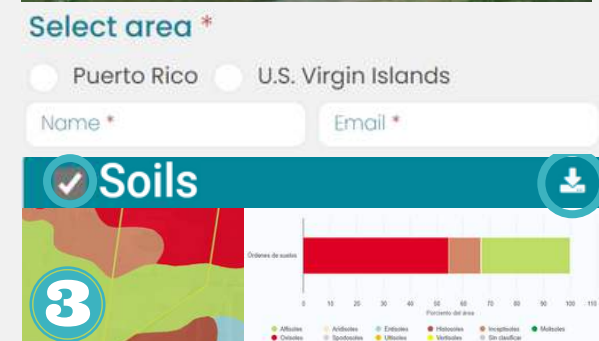

2

Start drawing your land by clicking on the **polygon icon**. Click to place **points** around the terrain. To close the polygon, you can double-click or click on the final point. To delete, you can start a new polygon or click **Delete**. Also, a geographic file can be use by clicking **Upload a KML**.

3

Select **Puerto Rico** or **U.S. Virgin Islands**. Fill in your **name and email**. Click **CREATE REPORT**. Explore the results by checking the layer boxes to display them on the map. You can download them in KML. Click **My land** to return to your area. You will receive an email with the report links.
